

## HAUNTED HEARTHSTONE 2020 Presents

### Sequential Killers of the Victorian Age – Part III

Hearthstone Historic House Museum will once again feature their popular theme with all new theatrical performances during Haunted Hearthstone season in October: Sequential Killers of the Victorian Age – Part III.

New characters will present a theatrical glimpse into the 19<sup>th</sup> century beginnings of serial murder investigation through the eyes of victims, detectives, and the perpetrators who stalked them.

The presentations will feature a walk-through tour of Hearthstone, decorated for mourning in the Victorian era, with many of the rooms each depicting a different character scene, with all new scenes for 2020. All characters represented are actual criminals of the 19<sup>th</sup> century. The event is being held on all Friday and Saturday nights in October, with 50-minute continuous presentations from 6 p.m. to 9 p.m.

While mass murders and serial killers have been found throughout recorded history, they truly began to garner attention in the Victorian era. In the social upheaval of industrialization, exploration, urbanization, and the growing prevalence of poverty, the public imagination became rife with the dark tales of crime. Sequential murders, real or fictional, began to crop up frequently in newspapers and literature with an increasing fascination by readers. Law enforcement was forced to react as people panicked, and they struggled to adapt to a new type of accurate detective work that required finding the culprits before the murders continued.

Open auditions were held for the characters for Haunted Hearthstone this year with over 10 in the cast. Hearthstone hopes to continue to establish contacts within the theatrical community to benefit other seasonal events as well, such as Victorian Christmas, the Hearthstone Music Series, and the popular *Mystery at the Mansion* events held in the spring.

The Haunted Hearthstone events have been growing in popularity, providing guests with different themes each year. “Because we change the events every year, the same guests can return for something completely new, and this year’s theme could very well prove to be the best yet”, said George Schroeder, Hearthstone Executive Director. “By putting on a more elaborate staged production, we appeal to those that are looking for more than simply a good scare. We offer a real look into the past which is in some ways, because of its authenticity, much scarier. Add the decorations of a Victorian mourning to Hearthstone, and you have the perfect setting for a Halloween seasonal event.”

More Information:

Tickets are reserved online only at <http://www.hearthstonemusum.org/events>. The 50-minute long performances start every 20 minutes from 6:00-9:00 pm on all Fridays and Saturdays in October. Due to Covid-19, we are limiting group sizes and contact. Tickets are \$18 online only for reserved times. Last year's performances sold out. Proceeds for the events go toward the operational budget for Hearthstone Historic House Museum.

**ABOUT HEARTHSTONE:**

Friends of Hearthstone, Inc. is a non-profit, privately funded organization with the mission of preserving Hearthstone Historic House Museum and the contents within for the promotion of its unique place in history, architecture, innovation, and culture in the Fox Cities area to its members and all those in the State of Wisconsin.

Hearthstone Historic House Museum is a large, beautifully restored Queen Anne Victorian Style home built in 1882 by Henry J. Rogers, Superintendent of the Appleton Paper and Pulp Mill. On September 30, 1882, Hearthstone was the first house in the world to be lit by an Edison central hydroelectric power station. The house retains many unique, genuine features, including the original Thomas Edison electroliers and light switches. Appleton was one of the first three cities in the world to be lit by an Edison central power station, the other two being New York and London. This was all due to Mr. Rogers, who decided to invest in Edison's power station in order to light two paper mills and his home. Since it became a museum in 1987, Hearthstone's focus is to preserve the house and its artifacts to re-create a historical experience based on its Thomas A. Edison heritage for the cultural enjoyment and educational benefit of the public through its many exhibits and educational programs.
